Proline Mass Series

The Proline Mass series provides outstanding reliability.

The metal shells are machined and hard black anodized to protect against damage through physical abuse.

The hermaphroditic design minimizes the number of required parts as two connectors allows for complete daisy chain capability.

All connectors include a heavy-duty dust cap.

Inline connectors have watertight cable strain relief utilising a basket weave design or watertight SKINTOP cable gland.

Proline Mass connectors are configured in the 176 contact contact position arrangement, for up to 56 pair cable and are fully compatible with the existing fixed pin solder type & crimp type Mass connectors, and use the same inline and panel mount housings.

The crimp type versions are designed for easy, positive insertion and removal of pins and sockets, using a standard crimp tool and locator insert available from ten 47

- Hermaphroditic Design
- IP67 when mated
- Crimp or Solder pins
- Intermateable with Whirlwind connector
- All machined construction
- Hard anodised black finish

Part Number explanation

Proline Mass Series		→	T176
Connector type		→	LMF
Inline connector	LMF		
Panel connector	PMF		
Contacts termination		→	S
Solder	S		
Crimp	C
