

Proline

Professional Audio Connectors

Proline Mass Series

The Proline Mass series provides outstanding reliability

The metal shells are machined and hard black anodized to protect against damage through physical abuse. The hermaphroditic design minimizes the number of required parts as two connectors allows for complete daisy chain capability.

All connectors include a heavy-duty dust cap. Inline connectors have watertight cable strain relief utilising a basket weave design or watertight SKINTOP cable gland.

Proline Mass connectors are configured in the 176 contact contact position arrangement, for up to 56 pair cable and are fully compatible with the existing fixed pin solder type and crimp type Mass connectors, and use the same inline and panel mount housings. A 122 way version also available on request.

The crimp type versions are designed for easy, positive insertion and removal of pins and sockets, using a standard crimp tool and locator insert available from Ten 47.

- Hermaphroditic design
- IP67 when mated
- Crimp or solder pins
- Intermateable with whirlwind connector
- All machined construction
- Hard anodised black finish

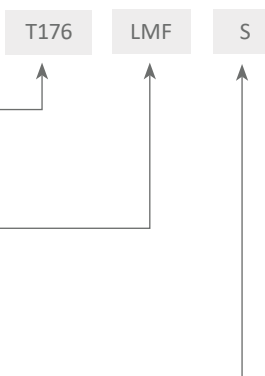

Part Number Explanation

Series	
Proline Mass	T176

Connector Type	
Inline Connector	LMF
Panel Connector	PMF

Contacts Termination	
Solder	S
Crimp	C

A 122 way version also available on request.

Also available from Ten 47

Tourline Multi Pin Connector

Circular Audio Multipin Connectors designed and manufactured to ensure continual and reliable operation in the harsh environment of professional audio.

A wide range of available insert arrangement allows connections from 13 poles (4 channel) to 201 poles (67 channels).

Speaker Connectors

Tourline Size 32, 25 Way Connectors

Tourline Size 32, 25 way multipin connectors for speaker applications designed to connect up to 12 channel line array systems in a single housing. Adopted by some of the world's leading speaker manufacturers, these connectors are based on our popular Tourline series and are manufactured to ensure continual and reliable operation in the harsh environment of professional sound applications.
